School of Engineering

Engineering students complete the freshmen engineering curriculum at UPG and then relocate to either the School of Engineering (Pittsburgh campus) or the Engineering Technology program (Johnstown campus).

To be eligible for relocation, students must fulfill the following: (1) completion of 34 credits at UPG with a minimum GPA of 2.75, (2) completion of all first-year engineering courses listed above with grades of C or better, and (3) the presentation of a satisfactory high school record with respect to selection of courses and test results.

Engineering students must also complete the following courses in the freshmen engineering curriculum with C or better grades:

- MATH 0220, 0230: Analytic Geometry and Calculus 1 and 2
- CHEM 0960, 0970: Chemistry for Engineers 1 and 2
- PHYS 0174, 0175: Basic Physics for Science and Engineering 1 and 2
- ENGR 0011: Engineering Analysis
- ENGR 0012: Introduction to Engineering Computing
- ENGR 0081, 0082: Freshman Seminar 1 and 2
- English Literature Elective
- Social Sciences Elective

In order to complete the freshmen engineering curriculum in two semesters, students must be eligible to take calculus in the first semester. Engineering students who do not place in calculus should consider taking prerequisite math classes during the summer or plan to spend an extra semester or two at UPG before relocating.
