ANTH 0770  INTRODUCTION TO ANTHROPOLOGY 1

Anthropology is the integrative study of who we are and where we come from. Anthropologists study all aspects of humans-including our evolution, our cultures, our languages, our histories, our entanglements with other living organisms, our health, our genetics, and so on. This course is a general introduction to the four fields of anthropology that looks at how anthropologists understand the cultural and physical aspects of humankind, past and present, across the world. This first part of a two semester course introduces the sub-disciplines of biological (aka physical) anthropology and archaeology. It addresses our primate origins and subsequent skeletal and biological evolution leading to an understanding of our bio-cultural selves today. The course also examines the development of culture through the study of artefacts (manufactured remains) of past human societies.

ECON 0100  INTRODUCTORY MICROECONOMIC THEORY

Introduction to principles of economic analysis as applied to the study of prices and markets. The course builds a theoretical basis for understanding producer and consumer behavior, and prepares students to appreciate the importance of markets in our economic system.

Class #28300  M/W/F – 9:00-9:50am
Develops the basic tools needed to analyze the behavior of various macroeconomic phenomena including inflation, gross domestic product, and unemployment. In addition, these tools are used to study how and whether the government can impact the behavior of the overall economy. Finally, the course looks at the role various institutions such as banks and the stock and bond markets play in affecting the economic environment.

Class #13644 T/Th – 8:30-9:45am

This first course in American literature explores the characteristic features of writings from the colonial period to the present. It emphasizes the interaction between literary texts and their social contexts, and examines the emergence of a national literature.

Class #21232 M/W/F – 10:00-10:50am

This course studies short stories that explore a variety of themes. It seeks to define the short story as a specific literary genre and to distinguish it from earlier forms of short narrative literature. It then goes on to examine the effects of literary, cultural and historical traditions on these stories and their reception.

Class #13649 T/TH -- 8:30-9:45am
HIST 0710 WORLD HISTORY TO 1500

This course is an introduction to the global history of humanity from its beginnings to about the year 1500, emphasizing common trends across regions and cultures.

Class #19924 M/W/F – 10:00-10:50am or
Class #29196 M/W/F – 1:00-1:50pm

MATH 0031 ALGEBRA

Covers basic algebra skills. Linear, polynomial, rational, exponential, and logarithmic functions are included. Systems of linear equations are also covered.

Class #13711 T/TH – 5:30-6:45PM or
Class #15135 M/W – 5:30-6:45pm

MATH 0200 PREP FOR SCIENTIFIC CALCULUS

A variety of topics are studied: functions, rational functions, logarithmic and exponential functions, graphs, asymptotes, inverse, conic sections, translation and rotation of axes, trigonometric identities and equations, and possibly vectors.

Class #13654 T/Th – 1:00-2:15pm

MATH 0220 ANALYTIC GEOMETRY AND CALCULUS 1

First of a sequence of three basic calculus courses. It covers the derivative and integral of functions of one variable and their applications.

Class #13676 T/Th – 3:00-4:40pm
MGMT 0021  THE MANAGEMENT PROCESS
An introduction designed to emphasize the basic principles, practices, and terminology essential to the understanding of contemporary business and its environment.

Class #23801 M/W/F – 1:00-2:15pm

MUSIC 0110  MUSIC FUNDAMENTALS
This course introduces the basic terms and concepts of music in the Western tradition. It trains students to recognize intervals, modes, and harmonic motion. It teaches students to read musical notation and also recognize timbres of different instruments. This course is designed to give students new to music familiarity with its basic sounds and notation, but also permits students with some previous experience to reinforce their reading and aural skills.

Class #21245 M/W/F – 10:00-10:50AM

MUSIC 0224  HISTORY OF WESTERN MUSIC SINCE 1750
This course traces the history of musical style from the late eighteenth century to the present, through a close study of representative works, in the context of leading artistic and intellectual trends.

Class #27445 M/W/F – 1:00-1:50PM

NATSC 0050  NATURAL SCIENCE 1
This course is intended to acquaint non-science majors with basic concepts that are important to an understanding of various natural physical and biological processes. Scientific principles and methodology are introduced through the integration of information from three key disciplines: biology, chemistry, and physics. The traditional lecture presentation is supplemented and enhanced by current relevant technological instructional aids.

Class #13670 T/Th – 5:30-6:45pm  or
Class #31350 T/TH – 4:00-5:15pm
PS 0200  AMERICAN POLITICS

This course is, quite generally, designed to provide students with a basic working knowledge of the basic goals of the constitutional framers, giving students an understanding of the purposes of the American political system; the essential structures (or institutions) within the American political system, the behavior (broadly defined) of the actors within the American political system, the purpose and performance of the linkage institutions in the United States (possibly including political parties, elections, and interest groups); and the types of policies that are often produced by a system with the characteristics of those found in the United States. Depending on the interests, area of expertise, and inclinations of the particular instructor, some of these may be emphasized more heavily than others.

STAT 0200  BASIC APPLIED STATISTICS

Teaches methods of descriptive and inferential statistics. Topics include data collection and description, hypothesis testing, correlation and regression, the analysis of variance, and contingency tables. Students will learn how to use a statistical computer package.

Class #13696  M/W/F – 2:00-3:10pm
STAT 1000  APPLIED STATISTICAL METHODS

Designed for students who want to do data analysis and to study further ideas in applied statistics beyond this course. The topics covered include descriptive statistics, elementary probability, random sampling, controlled experiments, hypothesis testing, regression and the analysis of variance. Emphasis will be placed on the statistical reasoning underlying the methods. Students will also become proficient at the use of a statistical software package. *(Blended course, combines in-class and on-line components)*

Class #16360  T/TH – 4:00-5:40pm
